

SNOW COLLEGE

BIOLOGY 1050

Title: Human Biology (lecture only)

A basic knowledge and understanding of human anatomy, physiology, and health will have a major effect on the quality of life of those possessing it. This knowledge can also assist in interactions with the medical community as well as dealings with related issues such as diet, air quality, drugs, as well as their political activity on such issues. A course in human biology gives the student a look at biology from the human perspective, that is, how biology is directly related to everyday life. Credit Hours 3.0

BIOLOGY 1055 (LAB)

Title: Human Biology Lab

This course is the laboratory component for BIOL 1050, Human Biology. This course is for students whose major course of study is not in the sciences. This course will partially satisfy Natural Science GE. Credit Hours 1.0

BUSINESS 1210

Title: Personal Finance

This course will introduce personal and consumer financial concepts and give students basic tools to make sound financial decisions in today's society based on economic trends and research. This is a practical course in personal money management consisting of financial planning including career choices, budgeting, planning for retirement, financing a home and automobile, and understanding consumer credit, taxes, insurance, and investments. Students will use basic math skills as well as read, write, and think critically. Note: This course is cross-listed as HFST 1210 and meets general education requirements for Social and Behavioral Science. Credit Hours 3.0

BUSINESS 1600

Title: Entrepreneurship Seminars

Description: In this course students are introduced to the challenges and rewards of entrepreneurship as they learn from the experiences shared by successful guest entrepreneurs. Each guest entrepreneur offers insight regarding starting, operating, and harvesting a successful venture to inform and inspire students. This course is repeatable. Credit Hours: 2

CIS 1000 (CIS Orientation) ONLINE CRN 6056

Description: The CIS orientation class is designed to introduce students to the program and degree pathway for the CIS department. Students will be introduced to the curriculum, pathways, and industry certifications. Students will be introduced to the learning model utilized in the department to include; online/hybrid instruction, required clock hours in class, and program outcomes. Students will learn how to utilize software platforms used in the program for learning (e.g., Canvas, NetAcad, and Packet Tracer). Credit Hours:3

CIS 1125 (IT Essentials) ONLINE CRN 6057

Description: This course discusses the history, role, and structure of computer architecture and operating systems needed by computers and provides an introduction to the computer hardware and software skills needed to help meet the growing demand for entry-level computer technicians. The curriculum covers the fundamentals of computer hardware and software as well as advanced concepts in security, networking, and computer technician responsibilities. Lab exercises include assembling a computer, laptop, and troubleshooting problems. The course prepares students for the CompTIA A+ certification exam. (Additional fee required)
Credit Hours: 3

CIS 1130 (Networking Basics) ONLINE CRN 6302

Description: Students will learn about the importance and networking in a digital world, and be introduced to network essentials required in many business functions today including business critical data and operations, cybersecurity, and much more. Students will learn to install a home and

small business network, develop basic network troubleshooting skills, and recognize network threats and basic mitigation techniques.

CHEMISTRY 1010

Title: Introductory Chemistry

This course is designed to give non-majors a glimpse at chemistry and how it relates to the world around them. It does this by exploring matter and the transformations it undergoes. The course also provides an insight to the physical and life sciences from the chemists point of view. It gives the student a feeling for how scientists view problems and the systematic method by which they solve them. Discussion topics are chosen from physical, organic, and biological areas inside the chemistry field.

Credit Hours 3.0

COMMUNICATIONS 1020

Title: Public Speaking

This is a practical and general course designed for students who desire to improve their speech efficiency, poise and self-confidence in public address situations. Special emphasis is placed on preparing, selecting, researching, organizing and delivering oral messages as well as on analyzing and evaluating the speaking-listening process. Credit Hours 3.0

COMMUNICATIONS 1500

Title: Intro to Mass Media

This course is an introduction into the nature of media and its relationship with the individual. The course teaches students to analyze, assess and evaluate popular culture, literature, and media. It includes a focus on various mediums including literature, radio, television, film, books, newspaper, and advertising to assist students in looking at the big picture of how media affects their perceptions. Credit Hours 3.0

COMMUNICATIONS 2110

Title: Interpersonal Communication

The study of interpersonal communication is the study of interaction between people. It is not only the conversation, but the study of relationships, problems, and situations and how they can be dealt with in an effective manner. This course is designed to study interpersonal communication from a descriptive as well as analytical point of view. The topics of interpersonal relationships, self-concept, perception, emotions, verbal and nonverbal language, listening, intimacy, climate, and conflict will be discussed. Possible methods of enhancing interpersonal communication situations will be practiced through discussion, role play, writing, critical evaluation, feedback and observance. Credit Hours 3.0

ENGLISH 1010

Title: Intro to Writing

This course emphasizes critical reading, writing, and thinking skills through writing-intensive workshops. It explores writing situations as a complex process focusing specifically on idea generation relative to audience and purpose, working through multiple drafts, peer collaboration, and revision, and it includes rhetorical analysis. Credit Hours 3.0

ENGLISH 2010

Title: Intermediate Research Writing

Students will build on the skills learned in ENGL 1010 in this intermediate writing course designed to improve students' reading, writing, research, and critical thinking skills. The course may include expository, persuasive, and/or argumentative writing emphases. The course will require several research oriented writing assignments. Students must achieve a C- or higher in this course to receive GE credit. Credit Hours 3.0

GEOGRAPHY 1300

Title: Peoples and Places of the World

This course is a study of the major geographical regions of the world, emphasizing the interrelationships between environment and human imprints. The course focuses on the following issues and problems: distribution of cultural characteristics such as population, migration,

language, religion, social customs, political and economic geography, urban patterns and settlements, agriculture, industry and resources. Physical geography concepts are also used to explain spatial patterns of cultural features. Credit Hours 3.0

HSFT 1500 (PSYCHOLOGY 1100)

Title: Human Development

In this course students learn about the fundamental principles of growth and development from conception through childhood to old age. The course includes the study of the biological process of development, as well as the emotional, social and cognitive development of the individual within a cultural and historical context. Credit Hours 3.0

HISTORY 2700

Title: U. S. History to 1877

This course covers the development of the United States to 1877, to include the Colonial Period, the American Revolution, the Nationalistic Period, Westward Expansion, Sectionalism, the Civil War and Reconstruction. This course, taken in conjunction with HIST 2710, will satisfy the American Institutions requirement. This course is offered only online. Credit Hours 3.0

HISTORY 2710

This course covers the development of the United States from 1865 to the present, to include Industrialism, the Last Frontier, the Progressive Era, World War I, the Roaring Twenties, the Great Depression and New Deal, World War II, the Cold War Era, the Civil Rights Movement, and Contemporary America. This course is offered only online. This course, taken in conjunction with HIST 2700, will satisfy the American Institutions requirement. Credit Hours 3

MATH 1030

Title: Quantitative Literacy

This course provides an introduction to mathematical modeling and problem solving utilizing algebra, discrete mathematics, geometry and statistics. Furthermore, students will examine some of the greatest ideas of humankind – ideas comparable to the works of Shakespeare, Plato, and Michelangelo. Imagination, creativity, and sound logic will all be crucial components of these mathematical explorations. The overarching theme of the course is to gain a deeper understanding and appreciation for math and its many applications to the world around us. Credit Hours 3.0

MATH 1040

Title: Intro to Statistics

Introduction to Statistics is an elementary introduction to the nature of statistical reasoning. Topics to be covered include descriptive statistics, sampling and data collection, basic probability, sampling distribution, and introduction to inference including confidence intervals and hypothesis testing. Graphing calculator required (TI-83 preferred). Credit Hours 3.0

MATH 1050

Title: College Algebra

In this course students will study polynomial, rational, exponential, and logarithmic functions. Additional topics include sequences and series, conic sections, matrices, the binomial theorem, modeling, and graphing technology. This course prepares students for trigonometry and calculus. Credit Hours 4.0

MUSIC 1010

Title: Intro to Music

A general appreciation course designed to make music meaningful to the average listener. The relationship of rhythm, melody, harmony, and form will

be demonstrated through selected recordings. The elements of music will be treated non-technically together with historical and biographical observations. Western art music will be discussed as well as music of other world cultures. Also, a general survey of folk and popular music will be provided. Credit Hours 3.0

MUSIC 1031

Title: History of Rock and Roll

This course provides students with an overview of the history of rock and roll music from its roots to the present day. Emphasis is placed on major stylistic trends and the artists who made major contributions to the evolution of this musical genre. Rock music will also be studied in a sociological context- both as an influence on, and as a reflection of the society in which it has operated. Fundamental musical concepts and vocabulary will also be addressed. Credit Hours 3.0

NURP 1000 (MEDA 1000)

Title: Medical Terminology

Medical Terminology provides the basic knowledge and background of the technical language of medicine. The course is a structured, 16-week, online course which uses a textbook and recommended audio CD Rom. Students learn the origins and definitions of root words, affixes, and abbreviations used in medicine today. This course is recommended for anyone interested in a health or medical field of study. Credit Hours 2.0

PHYSICAL SCIENCE 1000 (PHSC)

Title: Interdisciplinary Physical Science

This course is designed to give non-majors a glimpse at physics, chemistry, geology, meteorology, and astronomy, and how they relate to the world around them. It does this by using a conceptual approach to and demonstrations of the most significant and universal laws and models describing the physical world. The course also shows how the different disciplines in the physical sciences overlap and contribute to each other. Credit Hours 3.0

POLITICAL SCIENCE 1100

Title: American National Government

This course is an introduction to the structure, function, and political dynamics of the major institutions within the American governmental system. Credit Hours 3.0

PSYCHOLOGY 1010

Title: General Psychology

This course offers an introductory survey of general psychology theories and concepts with an emphasis on the scientific study of human behaviors and applications in daily life. Credit Hours 3.0

PSYCHOLOGY 1100 (HFST 1500)

Title: Human Development

In this course students learn about the fundamental principles of growth and development from conception through childhood to old age. The course includes the study of the biological process of development, as well as the emotional, social and cognitive development of the individual within a cultural and historical context. Credit Hours 3.0

SOCIOLOGY 1010

Title: Intro to Sociology

This course introduces students to the nature and scope of sociology, including a systematic treatment of group life, social institutions, social processes, social change, and social control. Variable credit may be earned. Credit Hours 3.0
